RESUME

Front-end developer with hands-on experience building user interfaces using React and TypeScript. I work on developing applications with REST API integration, state management, and a strong focus on usability and clean, well-structured code. I have experience collaborating with design teams using Figma and version control with Git/GitHub. Currently, I'm focused on growing my knowledge in application architecture and scalable systems.

PROFISSIONAL EXPERIENCE

Habit Construção

Sep 2024- Jun 2025

Front-end Developer Intern

- Developed and refactored components using React and TypeScript, improving code organization and maintainability.
- Implemented features and fixed bugs in a collaborative environment using Git and GitHub, following agile practices (Scrum and Kanban) to ensure stable deliveries.
- Integrated REST APIs into the interfaces, applying state management, error handling, and dynamic data rendering to improve application reliability.
- Contributed to interface design in Figma and its implementation in code, ensuring visual consistency and a better user experience.
- Collaborated with the team on the development of a WhatsApp automation system, aligning interface requirements with product needs.

Stack: React, TypeScript, Styled Components, HTML, CSS, Figma, Git, GitHub, Gitpod

SUN4 Softwares Solutions

May 2024 - Sep 2024

Design UX/UI e Front-End (Freelancer)

- Gathered requirements and organized feature flows, contributing to the initial product structure.
- Designed prototypes and interfaces in Figma aligned with the visual identity, ensuring consistency and a strong focus on user experience.
- Presented solutions and refined interfaces based on feedback, participating in iterative cycles within an agile environment.
- Built responsive interfaces using React, TypeScript, HTML, CSS, and Tailwind CSS, converting prototypes into functional applications.
- Performed visual adjustments and final validations to ensure design fidelity and consistency across pages.

Stack: React, TypeScript, Next.js, Tailwind CSS, Material UI (MUI), Figma, Git, GitHub, JavaScript

EDUCATION

Universidade Estadual da Paraíba

Bachelor's Degree in Computer Science

2021 - 2026

CERTIFICATIONS & COURSES

Cypress: Web Automation Testing from Zero to Hero - Udemy - End-to-end (E2E) test automation for web applications

React Testing Library and Jest: The Complete Guide - Udemy - Unit and integration testing, TDD, and code coverage

Redux + Zustand - Rocketseat - State management for scalable web applications

Nextjs e React - Udemy - Development of modern applications, SSR, routing, APIs, and hands-on projects

OUTROS

Technical Skills:

Front-end: React, Next.js, TypeScript, JavaScript, HTML, CSS

Styling: Tailwind CSS, Material UI (MUI), Styled Components

Tests: Cypress, Jest

Tools & Platforms: Git, GitHub, Gitpod, Figma
